

Now when you click on predict button from top right corner you will get redirected to predict.html

Let's look how our predict.html file looks like:

A screenshot of the "predict.html" page of the web application. The background is the same blue-tinted image of a human neck with a glowing red thyroid gland. In the top right corner, there are two buttons: "Home" and "Predict". The title "Thyroid Disease Classification" is centered at the top in a bold, yellow font. Below the title, there are five input fields, each with a label and a dropdown menu or text box: "goitre" (dropdown), "tumor" (dropdown), "hypopituitary" (dropdown), "psych" (dropdown), and "TSH" (text box). The labels are in a monospaced font.

A web form for thyroid disease classification. The background is a blue-tinted anatomical illustration of a human neck and upper chest, with the thyroid gland highlighted in red. The form is positioned on the left side of the image. It contains six input fields, each preceded by a label: TSH, T3, TT4, T4U, FTI, and TGO. Each label and its corresponding input field are enclosed in a light blue box. At the bottom left of the form is a green 'Submit' button.

TSH

T3

TT4

T4U

FTI

TGO

Now when you click on submit button from left bottom corner you will get redirected to submit.html

Let's look how our submit.html file looks like: it is ['miscellaneous'].
